Abdelrahman Eldamarany

React / Next.js / MERN Full-Stack Developer
Egypt, Cairo • +02-01111295894 • abdelrahmaneldamarany99@gmail.com
• linkedin.com/in/abdelrahman-eldamarany/

Professional Summary

React / Next.js / Full-Stack (MERN) Developer with 7+ years of experience building responsive, scalable, and maintainable web applications using React, Next.js, TypeScript, Node.js, Express.js, and MongoDB, along with modern backend technologies including Nest.js, Redis, and AWS cloud services.

Strong experience in frontend architecture, reusable component development, state management, RESTful API development, performance optimization, and responsive UI development. Skilled in backend middleware implementation, centralized error handling, and MongoDB queries and aggregation pipelines. Experienced in implementing Unit, Integration, and End-to-End (E2E) tests, as well as configuring and automating CI/CD pipelines to improve application reliability and streamline development and deployment workflows, & Comfortable working independently and collaborating with distributed teams.

Additionally, possesses 3+ years of hands-on experience in Machine Learning, Deep Learning, and AI, providing a strong foundation for integrating intelligent features and modern AI tools into web applications.

Professional Experience

React / Next.js / Full-Stack (MERN) Developer At Capital Numbers | Jan 2024 – Jan 2026

- Developed React and Next.js applications with end-to-end feature ownership using TypeScript, Zustand, Redux, and Redux Toolkit.
- Built reusable frontend architectures, integrated RESTful APIs, and developed responsive interfaces.
- Improved application performance using code splitting, lazy loading, memoization, and other optimization techniques.

Selected Projects:

- **Task Management System:** React • Node.js • Express.js • MongoDB • JWT — MERN application with authentication, task tracking, and CRUD operations.
- **Nana Food:** React • TypeScript • Zustand • Tailwind CSS • Google Maps — Food delivery platform.
- **Smart Mall Management System:** Next.js • TypeScript • AI Chatbot — Mall management platform with dashboards and AI-powered customer support.
- **ShopSphere:** React • TypeScript • Supabase • Context API • Tailwind CSS — E-commerce platform.
- **Business Operations Dashboard:** React • TypeScript • Node.js • Redux — Full-stack data management dashboard.

React / Full-Stack (MERN) Developer At Spectragold | Dec 2020 – Nov 2023

- Developed full-stack web applications using React, Node.js, Express.js, and MongoDB.
- Built reusable components, frontend architectures, state management solutions, RESTful APIs, and database models.
- Delivered responsive, maintainable applications independently with a focus on code quality and performance.

Selected Projects:

- **Shopping Platform:** MERN Stack • Context API • Bootstrap — Full-stack e-commerce platform.
- **Repository Listing Explorer:** React • Sass • Redux • REST API — Search and repository exploration application.

- **E-commerce Store:** React • Firebase — Responsive e-commerce application with authentication.
- **Online Books Library:** MERN Stack • Redux • Bootstrap — Full-stack library application with search and CRUD functionality.

Independent / Self-Employed React / Full-Stack / Next.js Developer | Jan 2019 – Dec 2020 & Jan 2026 – Present

- Developed responsive web applications and interactive UI solutions using React, JavaScript, Node.js, and Next.js.
- Converted Figma designs into responsive, production-ready interfaces using reusable components and modern UI practices.
- Worked independently across implementation, debugging, optimization, and project delivery.

Selected Projects:

- **Medical PDF Generator Dashboard:** React • Node.js • React Table — Data dashboard with dynamic tables and PDF generation.
- **Jerash Festival Platform:** React • Bootstrap — Responsive platform developed from Figma designs.
- **Location-Based Landmarks Application:** Next.js • TypeScript • Supabase • Context API • Tailwind CSS — Location-based application with AI chatbot.
- **STI Sports Store:** Vanilla JavaScript • Bootstrap — Responsive e-commerce interface.

Technical Skills

Frontend Development

- **Advanced:** React, Next.js 13+, State Management, Context API, Zustand, Redux, Redux Toolkit, Frontend Architecture, UI Development, Performance Optimization (Code Splitting, Lazy Loading, Memoization).
- **Good:** TypeScript, Tailwind CSS, Responsive Web Design, JavaScript DOM/BOM Manipulation, Styled Components, Regular Expressions, Angular.
- **Familiar / Basics:** Material UI, React Native, WordPress, Web Accessibility.

Backend Development

- **Advanced:** Node.js, Express.js, RESTful API Development, Express Middleware, Centralized Error Handling.
- **Good:** Nest.js, Redis, Authentication & Authorization (JWT), Supabase, Firebase.

Databases

- **Advanced:** MongoDB Querying, Filtering, and Aggregation Pipeline.
- **Good:** MongoDB, SQL.

Testing & Quality Assurance

- **Advanced:** Unit Testing, Integration Testing, End-to-End (E2E) Testing, Test Automation.

Programming Languages

- **Advanced**: JavaScript (ES6+), TypeScript, Python3(AI/Machine & Deep Learning)
- **Good** : C++

Web Technologies

- **Advanced**: HTML5, CSS3
- **Good**: Sass

Core Computer Science Skills

- **Advanced**: Problem Solving, Debugging, Algorithms, Built-in Data Structures
- **Good**: Object-Oriented Programming (OOP)
- **Familiar / Basics**: Custom Data Structure Implementations

DevOps & Cloud

- **Advanced:** CI/CD Pipeline Configuration & Automation, Automated Build, Testing, and Deployment Workflows.
- **Good:** Docker, Docker Compose, AWS (EC2, S3, Lambda, RDS, SQS, EventBridge).

Development Tools & Collaboration

- Git, GitHub, npm, Yarn, Vite, Postman, Agile Methodologies, Remote Collaboration, Code Reviews. API Integration, Responsive UI Development.

AI-Assisted Development

- Advanced practical use of Cursor AI, ChatGPT, and DeepSeek for development, debugging, research, code assistance, and productivity.

Soft Skills

- Strong problem-solving and analytical thinking skills
- Fast learner with strong adaptability to new technologies and tools
- Research & Development (R&D) mindset
- Ability to work independently and in remote environments
- Comfortable working in fast-paced environments

AI & Machine/Deep Learning

- Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, XGBoost, LightGBM
- Machine Learning: Classification, Regression, Clustering
- Data Preprocessing, Feature Engineering, EDA
- PyTorch, TensorFlow, neural networks, Keras, CNNs, RNNs, JAX, LLM, RAG, and Fine tuning
- Model Evaluation and Performance Analysis

Education

Bachelor's Degree in Computer Engineering

High Institute of Engineering, Minya, Egypt

Graduation Project — Broken Barrier Robot

Designed and programmed a robotic barrier system using two microcontrollers and C++. The system controlled motor movement based on predefined distance and timing parameters. L298N motor drivers were used to manage power delivery and control the motors.

Language Skills

- **Arabic**: Native
- **English**: Professional Working Proficiency

Certifications

- React Nanodegree — Udacity
- JavaScript Algorithms and Data Structures — freeCodeCamp
- Advanced styling with responsive design — Coursera
- Interactivity with JavaScript — Coursera
